

SugamFlow — Supported Business Types

Platform: SugamFlow ERP

Document version: 1.0

Last updated: June 2026

Overview

SugamFlow is a **multi-tenant, multi-outlet** retail and healthcare platform. Each shop (outlet) has a `businessType` that controls navigation, labels, modules, and API scoping. All types below are registered in `shop-management-ui/src/app/constants/business-types.ts`.

Complete business type registry

Code	Display name	Category	Maturity
GENERIC	Generic	Retail / fallback	Production
RETAIL	General retail	Retail	Production

AUTO_PARTS_DISTRIBUTOR	Automobile parts distributor	Automobile	Production
TYRE_BATTERY_SHOP	Tyre & battery shop	Automobile	Production
AUTO_MULTIBRAND	Multi-brand automobile store	Automobile	Production
OTHER	Other	Custom	Production

Healthcare suite (deep integration)

These types share **tenant-wide patient master**, clinical APIs, and cross-outlet routing within one tenant.

Polyclinic / clinic (POLYCLINIC, CLINIC)

- **Modules:** Reception queue, doctor dashboard, consultation pad, e-prescription, investigations, owner command center.
- **Routing:** Prescriptions → pharmacy outlet; lab orders → path lab outlet (same tenant).
- **Labels:** Patient (not Customer).
- **Example outlets:** TRUST-POLY-01, TRUST-MEDI-01.

Pharmacy (PHARMACY, MEDICAL)

- **Modules:** Medicine catalog, stock, prescription dispense queue, billing, GST, procurement.

- **Integration:** Bills polyclinic prescriptions; tenant-wide product catalog when linked to a clinic network.
- **Labels:** Patient on healthcare bills; medicine-specific product fields.
- **Example outlets:** TRUST-PHAR-01, TRUST-MEDI-PHARMACY-01.

Pathology lab (PATH_LAB, PATHOLOGY_LAB, DIAGNOSTIC_LAB)

- **Modules:** Sample worklist, test booking, report entry, PDF release, lab billing.
- **Integration:** Receives clinic referrals (consultationId, sourceType=POLYCLINIC); tenant-wide lab order APIs.
- **Labels:** Patient.
- **Example outlets:** TRUST-LAB-01, TRUST-MEDI-PATH-01.

Trust healthcare network pattern

One tenant can run **three sibling outlets**:

```
POLYCLINIC → consultations, Rx, lab referrals
PATH_LAB   → sample processing, reports
PHARMACY   → dispense & bill medicines
```

Automobile vertical

All types in the AUTOMOBILE_BUSINESS_TYPES set share vehicle master, OEM catalog, counter billing, and spare-parts workflows.

Type	Workshop / job cards
AUTO_PARTS	No
AUTO_PARTS_DISTRIBUTOR	No
TYRE_BATTERY_SHOP	No
AUTO_MULTIBRAND	No
AUTO_WORKSHOP	Yes
AUTO_SERVICE_CENTER	Yes
AUTO_DEALER	Yes

Modules: Vehicle registration, parts catalog, counter sales, workshop job cards (where applicable), procurement profile AUTO_PARTS.

General retail & services

These types use the **default retail capability profile**: product catalog, inventory, POS billing, purchase orders, GST, owner dashboard, staff management.

Type	Notable UI customisation
GROCERY	Grocery dashboard, expiry-aware inventory
ELECTRONICS	Electronics AI insights on owner dashboard
FASHION	Standard retail
JEWELRY	Standard retail
BEAUTY_PARLOR	Client label (not Customer)
RESTAURANT	Guest label; F&B oriented flows
WHOLESALE	Buyer label; B2B pricing
GENERIC / RETAIL / OTHER	Full retail toolkit

Capability matrix (summary)

Capability	Polyclinic	Path lab	Pharmacy	Medical	Auto	Retail
OPD / queue / doctor	✓	—	—	—	—	—
Path lab worklist	—	✓	—	—	—	—
Pharmacy dispense	✓	—	✓	✓	—	—
Tenant-wide patients	✓	✓	✓	✓	—	—
Tenant-wide clinical records	✓	✓	✓	✓	—	—
Retail product catalog	—	—	✓	✓	✓	✓
Automobile module	—	—	—	—	✓	—
Workshop job cards	—	—	—	—	✓*	—

* Workshop types only: AUTO_WORKSHOP, AUTO_SERVICE_CENTER, AUTO_DEALER.

Cross-cutting platform features (all types)

- Multi-branch / multi-outlet per tenant
- Role-based access (Shop Owner, Staff, Doctor, Lab Owner, etc.)
- JWT authentication via API gateway
- GST engine (India)
- Purchase orders & supplier management
- Inventory, batches, expiry
- Offline POS sync (MVP)
- Field force / salesman module (optional tenant)
- Subscription & shop onboarding
- Executive / owner dashboards

Adding a new business type

1. Add entry to BUSINESS_TYPE_OPTIONS in business-types.ts.
2. Register capabilities in business-type-capabilities.ts (or inherit retail / auto / healthcare profile).
3. Extend header navigation labels and route guards as needed.

4. No separate application fork — one Angular shell, lazy-loaded feature modules.

Source of truth: `shop-management-ui/src/app/constants/business-types.ts` and `business-type-capabilities.ts`.
