

SugamFlow Wholesale

WHOLE-DEMO-01 - Feature Catalogue & Sales Brief

Comparison vs Marg Distri (typical medical / pharma distribution ERP)

This document lists features available on the WHOLE-DEMO-01 demo depot (tenant 112), compares SugamFlow Wholesale with Marg Distri-class desktop ERP, and highlights SugamFlow selling points for medical distributors. Competitor columns describe typical Marg Distri / Marg Pharma posture by edition - not a single SKU verbatim.

1. Why choose SugamFlow (sales highlights)

Lead with outcomes owners care about: run the depot from anywhere, collect faster, stay GST-ready, and keep wholesale + retail options under one cloud stack - without a LAN-only Marg box as the single source of truth.

- Cloud command centre - Dayboard KPIs (sale, purchase, collection, credit) from phone or laptop; owner need not sit at the godown PC.
- Medical B2B path that closes - SO -> Confirm -> Challan -> Dispatch -> FEFO Invoice -> A4/PDF/WhatsApp GST print with IRN QR when live GSP is on.
- Credit & cash discipline in-product - credit control board, temp limits, interest postings, collection desk (cheque/UPI), AR ageing - not a separate add-on spreadsheet.
- GST go-live path - GSTR summary/export, GSTR-2B match, ITC eligibility ledger, live e-invoice / e-way via real GSP (mock for demo; http provider for production).
- Field force ready - delivery run + POD signature/photo, beat day plan, GPS check-in / coverage, offline DRAFT wholesale SO queue for low signal beats.
- Warehouse clarity - batch/expiry FEFO, rack/bin, stock intelligence (ABC/expiry), Code128 barcode labels (shelf/pack/batch).
- One SaaS platform - same tenant can add retail pharmacy or clinic packs later; continuous cloud deploy vs on-prem install + USB training cycles.
- Modern operator aids - Ctrl+K search, favourites/recent, F-key dayboard shortcuts, purchase bill hub - faster onboarding for staff who are not Marg veterans.

1.1 One-line pitch (use in calls)

"SugamFlow is cloud medical wholesale ERP: bill like a distributor, collect and control credit like finance, and go live on e-invoice/e-way - without locking the business to a single desktop PC."

2. Demo pack contents

- Shop: Wholesale Demo Depot (WHOLE-DEMO-01), GSTIN seeded, wholesale capability pack
- Catalog: 8 medical SKUs WHO-PH-001...008 (HSN + 12% GST)
- Buyers: Buyer 001...008 / chemist accounts with credit days
- Supplier: KM Medicos (Demo) for PO / GRN
- Ledger COA: Cash / Bank / Debtors / Creditors (+ interest income for credit interest demos)
- Opening stock batches with expiry for FEFO allocation
- Sample flow: Sales Order -> Confirm -> Challan -> Dispatch -> POD -> Tax Invoice -> IRN/e-way

3. WHOLE-DEMO-01 feature catalogue (live)

3.1 Wholesale billing & dispatch

Feature	What you can demo
Dayboard / owner command centre	Today sale, purchase, collection, KPIs, F-key shortcuts
Sale bill (SO workspace)	Buyer search, barcode scan, schemes, credit check, Create SO
SO lifecycle	DRAFT -> Confirm -> Challan -> Dispatch -> Invoice
Invoice (FEFO)	One-click challan + FEFO batch allocate + tax invoice

Feature	What you can demo
GST tax invoice print	A4 / thermal / PDF / WhatsApp; IRN + signed QR when generated
Generate IRN from sale bill	Compliance from wholesale workspace (mock or live GSP)
Bill desk / estimate	Estimate to SO hand-off
Delivery run / POD	Tablet run sheet, signature/photo POD
Beat day plan + GPS	Route -> buyers -> Create SO; visit check-in & coverage
Offline wholesale SO	DRAFT SO queue on device -> sync when online
Depot / MR salesmen	Salesman master + monthly targets
Price categories & rate contracts	Buyer category PTR + party-product overrides
Trade schemes + claims	Party/price-category scopes, evaluate, claim register
Bulk import	Wholesale master import helpers

3.2 Purchase & inventory

Feature	What you can demo
Purchase bill hub	Entry point to PO receive / Direct GRN / AP (one distributor screen)
Purchase PO / GRN / AP	PO -> receive -> AP invoice
Procurement / auto PO	Low-stock driven replenishment
Current stock	Batch / expiry / godown stock
Stock intelligence	ABC / XYZ / FSN + demand / expiry hints
Near expiry / ageing / margin	Batch risk and margin reports
Rack / bin + transfers	Locations and warehouse transfers
Barcode labels (Code128)	Shelf / pack / batch templates - scannable labels

3.3 Finance, credit & GST

Feature	What you can demo
Party ledger / collections	Receipts against buyer dues
Collection desk	Cheque / UPI / deposit queue
Credit control	Policy, overdue board, overrides, temp limits
Credit interest	Interest post -> ledger (Interest Income)
AR / AP ageing	Receivable and payable buckets
Cash / bank book + GL	CoA, vouchers, trial
Final accounts	P&L / balance sheet views
Sales analysis / MIS	Item / Company / HSN / Route / Area / Salesman; compare + CSV + drill
Sales returns / CN	Trade returns with GST
GSTR summary	GSTR-1 / 3B style period totals + export
GSTR-2B match + ITC	Upload match, eligibility ledger, accept/dispute, CA export
E-invoice / e-way (live path)	IRN, cancel, e-way, Part-B, bulk cancel/retry; GSP http provider

3.4 Platform / ops

Feature	What you can demo
Cloud web ERP	Browser access (desktop + responsive) - sugamflow.com
Multi-branch scoping	Branch / godown headers
Staff permissions	Role / permission packs
Universal search (Ctrl+K)	Invoice / GSTIN / batch / HSN / barcode
Favourites / recent / Help	Operator productivity + shortcut sheet

Feature	What you can demo
Business alerts	Rules for stock / expiry / credit
IP allowlist (optional)	Shop access policy + gateway filter
Report centre	Catalogue of sales / stock / GST reports
Audit trail	Wholesale transaction audit events

4. SugamFlow vs Marg Distri - gap matrix (updated)

Legend: Available = shipped on WHOLE-DEMO-01 / wholesale pack; Partial = usable with limits; Desktop-strong = typical Marg strength; Lead = SugamFlow clearer advantage for most cloud buyers.

Capability	SugamFlow WHOLE-DEMO-01	Marg Distri (typical)	Sales note
Deployment	Lead - cloud SaaS (multi-service)	Desktop / LAN-centric	Owner access from anywhere; no PC as single failure point
Medical B2B billing	Available (SO->Invoice FEFO)	Available (very mature)	Parity on core path; Marg wins pure keyboard veterans
Batch / FEFO / expiry	Available	Available (mature)	Demo FEFO on invoice - must-show
Buyer credit & dues	Available + control + temp limit + interest	Available (deep)	Sell credit discipline as built-in, not Excel
Schemes / free qty / claims	Available (scopes + claim register)	Available (deeper by edition)	Enough for most depots; Marg wins exotic company schemes
Party rates / categories	Available	Available	Parity
Challan + POD	Lead - web + tablet signature/photo	Available (often desktop)	Field POD is a clear differentiator
Purchase PO / GRN / AP	Available (+ purchase bill hub)	Available (deep voucher culture)	Hub helps first-time users; deeper one-screen bill still roadmap
Multi-godown	Available (branches)	Available	Parity
GST B2B + GSTR export	Available	Available	Parity for period returns
GSTR-2B / ITC recon	Available (match + ITC ledger + CA export)	Desktop-strong / CA tooling	Closing the old "thin" gap; still iterate with CA feedback
E-invoice / e-way	Available (live GSP http + Part-B + bulk ops)	Available (edition / GSP dependent)	Hard production blocker - SugamFlow has go-live path
Sales analysis / MIS	Available (dims + compare + CSV + drill)	Available (rich MIS)	Strong enough for owner reviews
Dayboard / KPIs	Lead - web command centre	Dashboards vary by edition	Open every demo on Dayboard
Collection desk	Lead - in-product queue	Partial / add-on patterns	Highlight vs "accounts later"
Mobile / tablet POD	Lead	Partial (apps vary)	Show delivery run on tablet
Offline / beat booking	Partial (offline SO queue + GPS visits)	Desktop-strong offline	Honest: Marg still stronger offline resilience
Salesman beat / route	Available (beat day plan + GPS coverage)	Desktop-strong culture	Much stronger than prior "route dims only"
Barcode label printing	Available (Code128 shelf/pack/batch)	Available	Closed prior partial gap
Same tenant retail+clinic	Lead - multi-pack SaaS	Usually separate products	Upsell path for groups with retail counters
Implementation	Lead - SaaS continuous deploy	On-prem install + training	Faster go-live; lower IT burden

5. Where SugamFlow leads (use these in proposals)

- Anywhere access - dayboard, AR, stock, and GST screens without VPN to a shop PC.
- Collection + credit control + collection desk in the same product as billing.
- Tablet POD and beat GPS - delivery proof and field coverage without a separate app stack.
- Live e-invoice / e-way architecture (GSP adapter) - production-ready path medical distributors demand.

- GSTR-2B match and ITC workflow aimed at CA hand-off, not only GSTR summary.
- Multi-business packs under one tenant (wholesale today; pharmacy/clinic when needed).
- SaaS updates - features (schemes, MIS, compliance) ship continuously without CD installs.

6. Remaining honest gaps vs Marg (do not oversell)

- Keyboard muscle memory - Marg veterans may still type faster on pure desktop billing.
- Ultra-deep company scheme / claim settlement patterns on some Marg editions.
- Fully offline desktop resilience when internet is down for hours (SugamFlow: SO queue + sync; not full LAN ERP).
- One-screen purchase bill voucher depth - hub + GRN/AP exist; Marg-style single voucher still improving.
- Local CA "I already know Marg screens" familiarity - train with our demo script, not feature denial.

7. Objection handling (sales)

Buyer says	SugamFlow reply
We already know Marg	Keep Marg for nostalgia if needed - SugamFlow wins on owner visibility, POD, cloud, and GST live path. Staff learn Dayboard + Sale bill in one session.
Will e-invoice work?	Yes - live GSP http provider; demo uses mock/fake adapter. Production needs your GSP credentials (ClearTax/IRIS/etc.).
Internet fails on beat	Offline DRAFT wholesale SO syncs when back online; GPS check-in works for coverage. Not a full offline Marg PC - say so honestly.
Our CA wants 2B	Show GSTR-2B match + ITC accept/dispute + CA export on WHOLE-DEMO-01.
Cost / IT headache	Browser SaaS - no LAN server, no USB update cycle; multi-branch from day one.

8. Suggested client demo script (WHOLE-DEMO-01)

- 1) Login -> Dayboard KPIs (owner story: see money without sitting at godown)
- 2) Sale bill -> Buyer 005 -> WHO-PH-001 -> Create SO -> Confirm -> Invoice (FEFO)
- 3) Print A4 GST invoice -> Generate IRN -> reprint with QR
- 4) Delivery run / POD signature (tablet)
- 5) Beat day plan -> GPS check-in -> Create SO from beat
- 6) Purchase bill hub -> KM Medicos PO/GRN
- 7) Credit control + collection desk + AR ageing
- 8) Sales analysis compare/CSV + GSTR summary + GSTR-2B match
- 9) Stock intelligence (ABC / expiry) + Code128 barcode label
- 10) Close with cloud + multi-pack + SaaS update story

9. Disclaimer

Marg, Marg Distri, and Marg Pharma are third-party products. Feature cells reflect category norms observed in Indian wholesale distribution software and SugamFlow WHOLE-DEMO-01 capabilities as of this document date. Exact Marg features depend on edition, modules purchased, and version. Validate compliance (GST, Drugs & Cosmetics, e-invoice) and obtain real GSP credentials before contractual go-live commitments.
