

# SugamFlow — Polyclinic / Clinic

**Client overview & industry comparison**

**Business type:** POLYCLINIC (Healthcare OPD & consultation)

**Entity label:** Patients

**Document version:** 1.0 · June 2026

## Executive summary

**SugamFlow** is a cloud-based operations platform for Indian SMBs. **Polyclinic / Clinic** (POLYCLINIC) OPD-focused clinic profile: reception queue, doctor dashboard, consultation pad, e-prescription, lab referrals, and pharmacy handoff within one healthcare tenant.

## Who is this for?

| Fit                       | Examples                            |
|---------------------------|-------------------------------------|
| Multi-doctor polyclinics  | Several specialists, one front desk |
| Single-doctor clinics     | GP, paediatric, dental (basic)      |
| Diagnostic + consultation | Clinic that refers to own path lab  |
| Trust healthcare networks | Clinic + lab + pharmacy siblings    |

**Typical users:** Owner, counter staff, doctor/reception (healthcare).

## Daily operations covered

| Area                                                   | What SugamFlow does                                    |
|--------------------------------------------------------|--------------------------------------------------------|
| Reception queue & OPD token management                 | Reception queue & OPD token management                 |
| Doctor dashboard & consultation pad                    | Doctor dashboard & consultation pad                    |
| E-prescription writing                                 | E-prescription writing                                 |
| Lab order referrals to sibling path lab (same tenant)  | Lab order referrals to sibling path lab (same tenant)  |
| Pharmacy dispense tab for prescriptions                | Pharmacy dispense tab for prescriptions                |
| Patient master (tenant-wide across healthcare outlets) | Patient master (tenant-wide across healthcare outlets) |
| Investigations & patient chart timeline                | Investigations & patient chart timeline                |
| Owner command center for clinic KPIs                   | Owner command center for clinic KPIs                   |

**Also included:**

- Routes Rx to pharmacy outlet; lab orders to path lab (same tenant)

## Industry software landscape (India)

| Category                   | Representative products             | Typical strength    | Typical limitation        |
|----------------------------|-------------------------------------|---------------------|---------------------------|
| <b>Clinic EMR</b>          | Practo Ray, HealthPlix, Lybrate Pro | OPD & Rx workflows  | SaaS lock-in              |
| <b>Hospital HMIS</b>       | Birlamedisoft, Medeil Clinic        | Full hospital stack | Overkill for small clinic |
| <b>Pharmacy ERP add-on</b> | Marg + clinic module                | Billing integration | Fragmented UX             |
| <b>Standalone billing</b>  | Excel + paper Rx                    | Zero software cost  | No audit trail            |

## Feature comparison — SugamFlow vs industry software

| Feature                 | SugamFlow                       | Practo Ray  | HealthPlix   | Marg clinic  | Paper/Excel |
|-------------------------|---------------------------------|-------------|--------------|--------------|-------------|
| <b>Best for</b>         | Clinic + lab + pharmacy network | SaaS clinic | Desktop EMR  | Paper clinic |             |
| <b>OPD queue</b>        | ✓                               | ✓           | ✓            | —            |             |
| <b>E-prescription</b>   | ✓                               | ✓           | ✓            | —            |             |
| <b>Lab referral</b>     | ✓ Tenant                        | Partner API | Add-on       | Phone        |             |
| <b>Pharmacy handoff</b> | ✓ Same tenant                   | —           | Separate SKU | Walk         |             |
| <b>Multi-doctor</b>     | ✓                               | ✓           | ✓            | —            |             |

## Why clients choose SugamFlow

1. One tenant for clinic, lab, pharmacy—no integration project
2. Doctor sees patient chart & lab timeline
3. Web-based—no heavy HMIS deployment
4. Indian GST posture for clinic billing where applicable

## Included today vs roadmap

| Included today                                         | Roadmap / not full parity yet |
|--------------------------------------------------------|-------------------------------|
| Reception queue & OPD token management                 | IPD / bed management          |
| Doctor dashboard & consultation pad                    | Insurance TPA                 |
| E-prescription writing                                 | Teleconsultation              |
| Lab order referrals to sibling path lab (same tenant)  |                               |
| Pharmacy dispense tab for prescriptions                |                               |
| Patient master (tenant-wide across healthcare outlets) |                               |

## One-line pitch

SugamFlow Polyclinic = OPD queue + doctor pad + Rx + lab & pharmacy routing on one healthcare tenant.
