

Ravi's Daily Checklist — Field Force Shop Onboarding

One-page guide for **salesman / promoter in the field**. Share with your team or print on A4.

URLs (bookmark these)

Who	Local (dev)	Production
Salesman — login	http://localhost:4200/login	https://sugamflow.com/login
Salesman — workspace	http://localhost:4200/field-force/workspace	https://sugamflow.com/field-force/workspace
Public register (do NOT use for field sales)	http://localhost:4200/register	https://sugamflow.com/register
Super admin — activate shops	http://localhost:4200/admin/platform-dashboard	https://sugamflow.com/admin/platform-dashboard

After login, salesman/promoter goes automatically to **Field Force workspace** (not the shop POS).

Before first visit (one-time — Super Admin)

#	Task	Where
1	Create promoter (if needed)	Admin → Field force → pick Tenant → Add promoter
2	Create salesman under promoter	Same screen → Add salesman
3	Create login invite for salesman	Admin → Login invite → role Field force — salesman → link salesman ID
4	Salesman sets password	Email / link from invite

Salesman login = **his own** username and password. **Not** the shop owner's login.

At the shop — Salesman's steps

Example: Ravi visits **Aniket Medical Store**, gives demo, Aniket agrees.

Step 1 — Log in (salesman's phone)

1. Open **login** URL
2. Enter **salesman's** username + password
3. You land on **Field Force workspace**

If you see "missing salesman id" → super admin must fix the login invite (salesman ID not linked).

Step 2 — Save prospect (NOT a shop yet)

On **Field Force workspace**:

Field	Example
Business name	Aniket Medical Store
Mobile	9876543210
Owner name	Aniket (optional)
City / State	optional

Click **Save lead**. You get a code like **LD-42**. Shop does **not** exist yet.

Step 3 — Log the demo

1. Click the lead in **My leads**
2. Activity type → **DEMO**
3. Add notes (e.g. "Showed billing + stock")
4. Click **Log activity**

Step 4 — Convert to real shop (when owner says yes)

On the same lead → **Conversion pipeline**:

#	Action
1	Choose Subscription (Monthly / Yearly)
2	Check KYC verified (or click Mark KYC)
3	Click Save subscription
4	Enter Owner username
5	Enter Owner email (password link goes here)
6	Click Complete conversion

System creates: real shop ID e.g. **FF-LD-42**, status **PENDING**, email to owner. Salesman gets **credit** on this lead.

Step 5 — Tell the shop owner

"Check your email for SugamFlow password setup. Your shop ID is **FF-LD-42**. It will be active after our team approves."

Do not send the owner to /register — that bypasses salesman credit.

After visit — Super Admin

#	Task	Where
1	Open Platform dashboard	/admin/platform-dashboard
2	Find shop FF-LD-42	Status PENDING
3	Activate shop	PENDING → ACTIVE
4	(Optional) Check commission	Admin → Field force → Tenant → Commission entries

Owner can then log in and use the shop.

What NOT to do

Don't	Why
Use /register after a field visit	No salesman credit
Use owner's login as salesman	Wrong role; no tracking
Skip "Save lead" and only use public form	No demo history, no commission
Expect shop to work instantly	PENDING until super admin activates

Right vs wrong flow

Wrong (loses credit): Demo → /register → fill form → done

Right (salesman credited): Login → Save lead → Log DEMO → Complete conversion → Admin activates

Roles cheat sheet

Person	Login	Main screen
Salesman	Field force salesman	Field Force workspace
Promoter	Field force promoter	Field Force workspace
Shop owner	Owner account (after email)	Owner dashboard / POS
Super admin	Super admin	Platform dashboard

If something fails

Problem	Fix
Can't open workspace	Use salesman login; role must be FIELD_FORCE_SALESMAN
"Missing salesman id"	Super admin: recreate login invite with salesman linked
"Cannot reach server"	Gateway/backend not running (dev) or server down (prod)
Conversion OK but shop not working	Super admin must activate on platform dashboard
Owner didn't get email	Check spam; super admin can resend invite

One-line rule

Field visit = Field Force login → lead → demo → conversion. Never /register when a salesman was involved.
